

ABSTRACT

**APPARATUS AND METHOD FOR WORKFLOW**

5

A computer apparatus for implementing a workflow, the workflow being defined by a sequence of activity nodes that include a plurality of interactive nodes, the computer apparatus comprising a processor for arranging and initiating the execution of the activity nodes in accordance with the defined

10 sequence, wherein each interactive node is arranged to allow a user to input data for use in the execution of an activity node, the processor being arranged to analyse the user data to determine the interactive node in the sequence of activity nodes to which the data is associated.
